

What is claimed is:

1. A bibcock for washbasin comprising:  
a body of a predetermined height mounted at the upper end  
5 of a washbasin for being supplied with hot and cold water, the  
body having a valve therein;  
a discharge pipe extending from the body to the front side  
and having a outlet formed at an end thereof for hot and cold  
water supply; and  
10 a control lever mounted at the front side of the lower body  
of the discharge pipe and connected with the valve for regulating  
the amount of hot and cold water supplied.
